UMHLATHUZE MUNICIPALITY

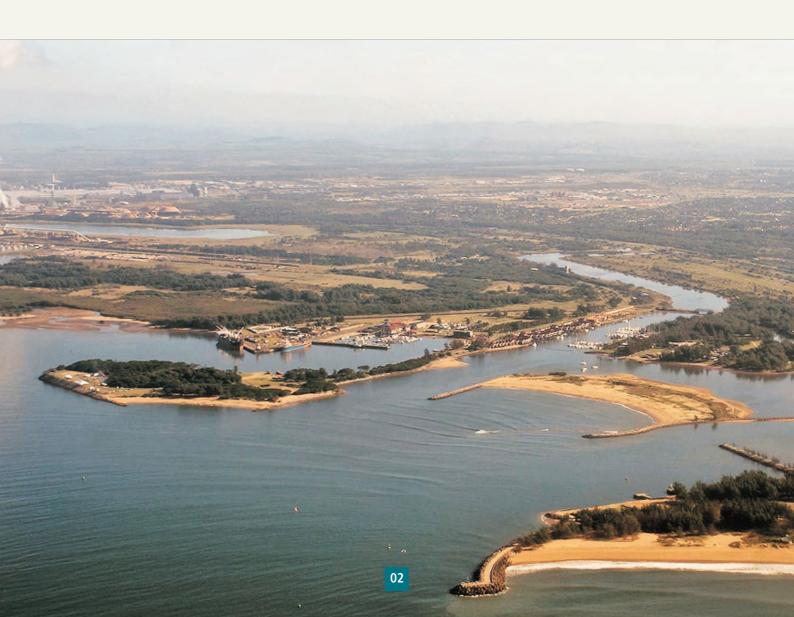

BACKGROUND

Richards Bay and Empangeni are the most significant economic centres in the Local Municipality and in the District Municipality as well. Richards Bay, as a harbour and industrial town, attracts people from surrounding towns, rural settlements and from beyond the district. Empangeni's role as an industrial, commercial and service centre to the settlements of Esikhaleni, Eshowe, Nkandla, Ntambanana and other rural settlements attracts many people to the range of higher order services available in the town.

The vast majority of economic performance in the district is vested in uMhlathuze Local Municipality, notably in Richards Bay and Empangeni. This area is the third most important in the province of KwaZulu-Natal in terms of economic production (GGP) and total employment.

There are a number of natural and man-made phenomenon that have shaped and continue to shape the uMhlathuze Municipality. The area is inundated with a system of wetlands and natural water features such as Lakes Cubhu, Mzingazi, Nsezi and Nhlabane. Major rivers include the Mhlathuze and Nsezi.

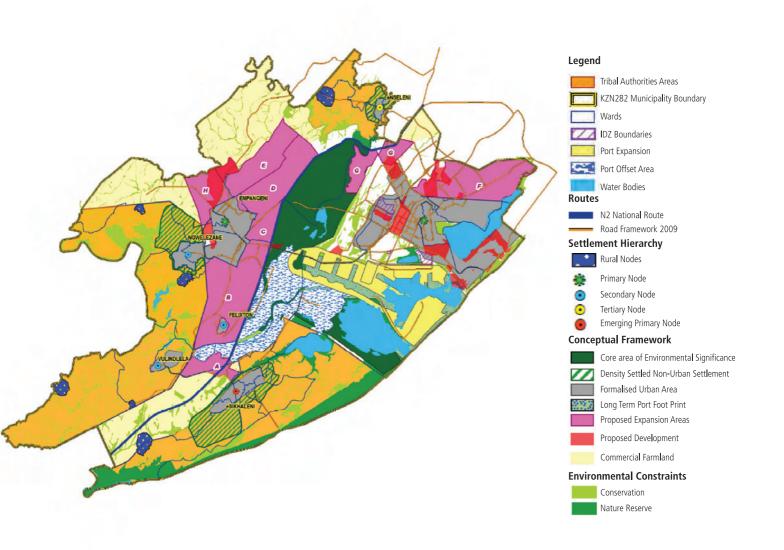

The main access into the municipal area is via the N2 in a north south direction and in an east west direction the R34 from Ntambanana. Other significant roads in the area include the MR431 (that provides a northerly entry into Richards Bay from the N2) as well as the Old Main Road that straddles the N2 on its inland.

LONG TERM DEVELOPMENT VISION

The council's Spatial Development Framework provides a 50 year development vision and guides future developments in line with investment decisions and interventions. It identifies realistic areas of future development and expansion and gives consideration to, amongst others, the following:

- Environment
- Geotechnical Conditions
- Air quality
- Planning principles
- · Densification
- Transport networks
- · Port expansion

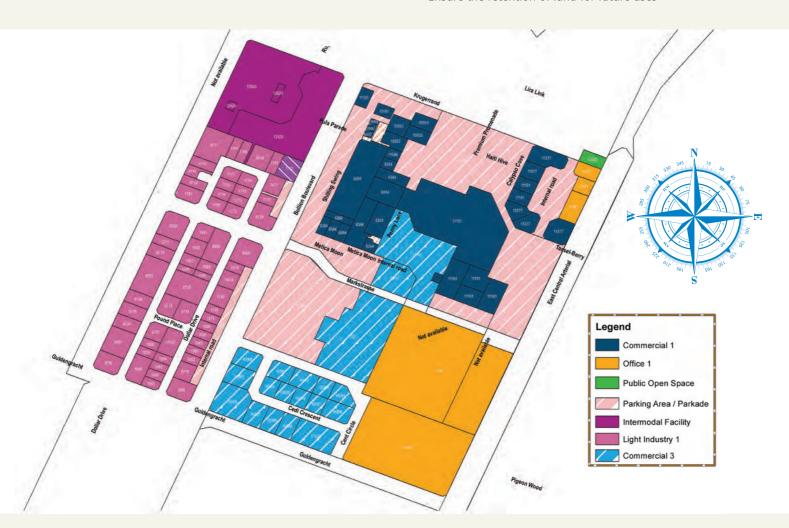

LAND USE MANAGEMENT SCHEME

Planning and Development in KwaZulu-Natal is directed and regulated by the KwaZulu-Natal Planning and Development Act [PDA], 2008 [Act Number 6 of 2008]. This entails that an application may be processed in compliance with the PDA prior to land or buildings are developed or utilised for a specific purpose. Furthermore, this means that permission or authorisation must still be sought in compliance with the PDA, even if the land use change or development requires permission or authorisation in compliance with another law.

The main purpose is the following:

- Promote certainty of land use, thus protecting property values and creating investor confidence
- Resolve conflict between varying land uses and eradicate negative impacts
- Enable a co-ordinated use of land and the efficient use of land
- Protect natural resources or ecosystem services
- Protect unique areas or features
- Manage land generally and its uses
- Provide a statutory basis for public involvement and a means of enforcement
- Balance interests of the individual with those of the public
- Ensure the retention of land for future uses

GUIDELINE FOR POSSIBLE ENVIRONMENTAL IMPACT ASSESSMENT TRIGGERS FOR INDUSTRIAL AND INFRASTRUCTURE DEVELOPMENT

The following are typical activities that warrant environmental approval in the form of a basic assessment process. Such approval is granted by the competent authority stipulated in terms of the 2010 Environmental Impact Assessment Regulations.

- 1. Construction of facilities or infrastructure that generate between 10 megawatts and 20 megawatts of electricity, or that occupies a footprint larger than 1Ha
- 2. Any facility storing coal and ore that requires a permit in terms of the Air Quality Act
- 3. The construction of facilities or infrastructure, including associated structures or infrastructure, for the storage of 250 tons or more but less than 100 000 tons of coal
- 4. Electricity, Water/Sewer or Storm Water infrastructure traversing wetlands.
- 5. Overhead electricity lines and underground cables that transmit more than 275kV
- 6. Construction of roads wider than 13,5 meters
- 7. Any development that requires the infilling or removal of soil from a wetland
- 8. Storage of fuel exceeding eighty thousand (80 000) litres
- A development with a footprint larger than 50 square meters within coastal public property; or within 100m of the high water mark; within a setback line
- 10. Transformation of land bigger than 5Ha
- 11. Transformation/ Rezoning of Public Open Space bigger than 1000m²

The following are typical activities that warrant environmental approval in the form of a full Environmental Impact Assessment process, which consists of scoping phase and EIA phase where specialist investigations are undertaken. Such approval is granted by the competent authority stipulated in terms of the 2010 Environmental Impact Assessment Regulations.

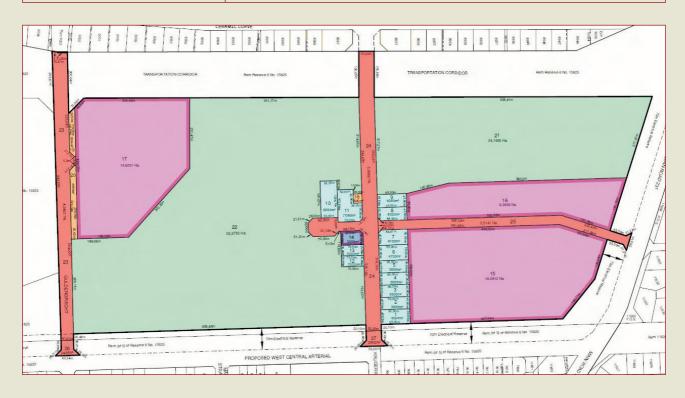

- 1. Construction of facilities/infrastructure that generate more than 20 megawatts of electricity
- 2. Storage of fuel exceeding 500m³
- 3. Gas pipelines exceeding 1000 meters, or which have a throughput capacity of 700 tons per day
- 4. Electricity lines outside urban or industrial areas exceeding 275kV
- 5. Transformation of land bigger than 20Ha
- 6. Conversion of virgin land for timber plantations exceeding 100Ha

Any EIA conducted within proximity of a Geographically sensitive area of the municipality identified in terms of the Protected Areas Act or Biodiversity Act, which relate to construction activities of:

- Billboards/Advertising boards exceeding 18 square meters outside mining areas or industrial complexes
- Cell masts or communication towers exceeding 15 meters or within a site that was not used previously for such purposes
- Roads wider than 4 meters seawards of a setback line
- Clearance of indigenous vegetation of an area 300 square meters
- Facilities, infrastructure or structures of any size for aquaculture purposes within 100m from the edge of a watercourse or set back line
- Construction of jetties, slip ways or buildings exceeding 10 square meters seaward of a setback line

INDUSTRIAL DEVELOPMENT

THE DEVELOPER SHOULD ENSURE THE FOLLOWING

- 1. Select/employ an Architect registered with SACAP (South African Council for the Architectural Profession), to prepare submission drawings.
- 2. Make contact with the Building Control Officer on matters relating to the plans approvals.
- 3. Prepare and submit the building plans for approval, and only when the plans approval is granted that the Developer may commence with the construction of the project.
- 4. The approval process for single dwelling units will take about one month and, for the big buildings it would take about 3 months.
