1. INTRODUCTION

These Ward Profiles were prepared by the IDP Unit based on Census 2011 statistics. These Profiles provide a portrait of the demographic, social and economic characteristics of the people and households in each City Ward. The Census Profiles contain information on population by age, households and dwelling types, families, and language groups etc.

2. WARD VISION – DESIRED FUTURE

“To be the community which is well developed, Self - Sustainable, Educated and Living In a Secure, Healthy & Comfortable Environment”

3. WARD CHALLENGIES – CURRENT REALITY

4. SIZE OF THE WARD

Ward 17 has an estimated population of **10464** as per Census 2011

5. WARD COMMITTEE STRUCTURE

Ward 17 has a fully established ward committee with each member representing each portfolio; the following are members of the ward committee:

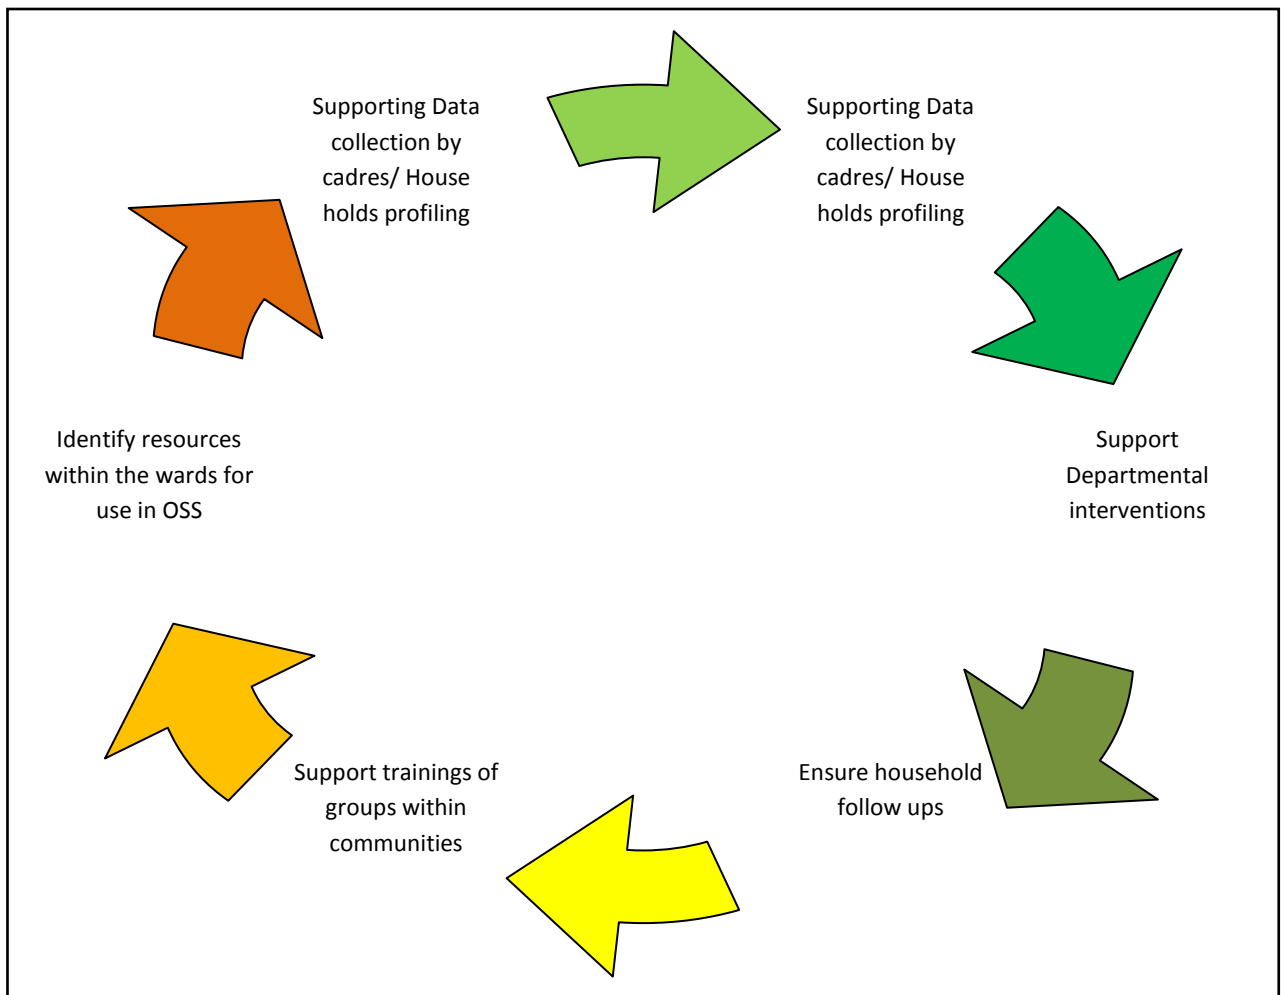

Figure 1: Ward Committee

5.1 War Room Representatives

War Rooms are an integrated service delivery structure comprised of government, municipality, CBOs, business and other stakeholders at ward level. Their main responsibility is not limited to the following:

Figure 2: War Room: Objectives

The war room seat once fortnightly on Wednesdays at 10:00, it is championed by the Ward Councillor and the following are executive members of Ward 17 War Room:

EXECUTIVE MEMBERS OF WARD 17 WAR ROOM:

Committee Members	Designation	Contact No.
JABULANI MSANE	CHAIRPERSON	0729339619
PINKIE NENE	SECRETARY	0790657248

6. DEMOGRAPHICS

6.1 Population

The 2011 Census population of Ward 17 is estimated at **10464**.

Figure 3: Population by Population Group

Source, Stats SA Census_ 2011

From the figure above it is clear that Ward 17 is 100% dominated by the Black African Population.

6.2 Age and Gender Profile

Knowledge about the age-sex distribution of a population is valuable information on demographics and social economic concerns. Figure - below presents the distribution of the ward population by age and sex. The figures below show that there are a fairly large proportion of males than females in all age groups. At an elderly stage, age groups 75-79 - 85+) more females seems to be surviving that males.

Figure 4: Age and Gender Pyramid

6.3 Language

Out of eleven South African languages, isiZulu is the main spoken language, followed by IsiNdebele then Setswana and English with same percentage, the statistics correlate with the statistics above where population group is highly dominated by Black African population group.

Figure 5: Language

6.4 Age Groups in 5 years by Population group and Gender

Table 1: Age group in 5 years by population group and Gender

	Black African		Coloured		Indian or Asian		White	
	Male	Female	Male	Female	Male	Female	Male	Female
00 - 04	519	546	3	-	-	3	-	-
05 - 09	474	456	3	-	-	-	3	-
10 - 14	471	459	3	3	-	-	-	-
15 - 19	558	576	6	-	-	3	-	3
20 - 24	561	729	-	3	3	-	-	-
25 - 29	585	747	-	-	-	-	-	-
30 - 34	420	546	-	-	-	-	-	3
35 - 39	366	354	3	-	-	3	-	-
40 - 44	249	249	-	3	-	-	-	-
45 - 49	219	291	-	-	-	-	-	-
50 - 54	222	204	-	-	-	-	-	-
55 - 59	147	132	-	-	-	-	-	-
60 - 64	51	66	-	-	-	-	-	-
65 - 69	30	51	-	-	-	-	-	-
70 - 74	15	30	-	-	-	-	-	-
75 - 79	3	21	-	-	-	-	-	-
80 - 84	9	12	-	-	-	-	-	-
85+	6	9	-	-	-	-	-	-

From the figure above it can be deduced that in this ward at birth age there are more Black African males born, that is consistent with all population groups, and hence the highest age groups is 00-04 and 25-29. This indicates that we have more infants in this ward more than adults across all population groups. And the ward is also dominated by young people as depicted above. At elderly age group more surviving at age 85+ females can be found from the black African population, obviously because Black African are majority.

6.5 Child and Female Headed Household

Figure above indicates that a large proportion of is Male headed Household, within an group of (25-29) ; however it noted that there is a remarkable rate of Female headed households as well especially towards the elderly age group. There is small proportion of child headed household, if we consider age groups (10-14; 15-19 and 20-24).

6.6 Marital and Civil Partnership Status

From the figure below it is noticeable that a higher percentage of the adult population that has never married is at 72% followed by married population at 19%. The percentage of a population living together as married couples is at 6% and only a 2% of widows/widower population is found at ward 17.

Figure 6: Marital Partnership

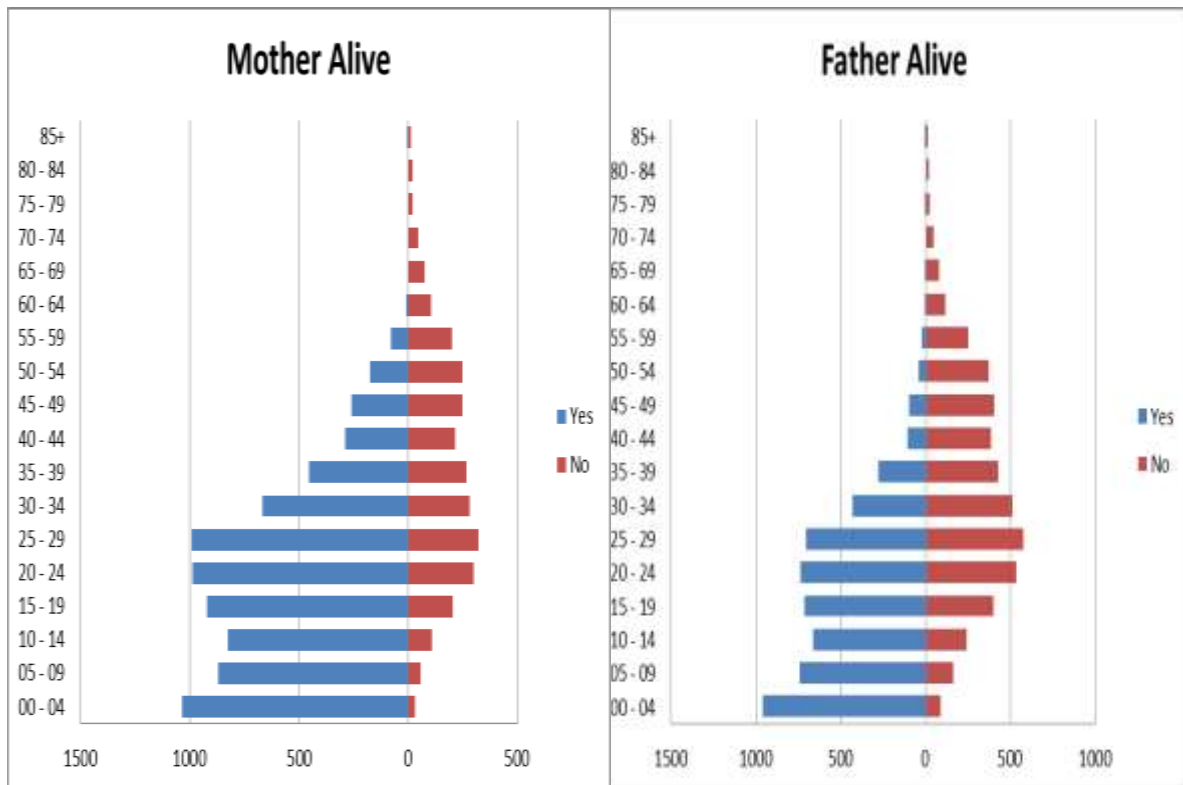

Table 2: Migration, Province of Birth by Region of Birth

	Born in South Africa	SADC	Rest of Africa	United Kingdom and Europe	Asia	North America	Latin America and Caribbean	Oceania
Western Cape	6	-	-	-	-	-	-	-
Eastern Cape	54	-	-	-	-	-	-	-
Northern Cape	51	-	-	-	-	-	-	-
Free State	15	-	-	-	-	-	-	-
KwaZulu-Natal	9720	-	-	-	-	-	-	-
North West	6	-	-	-	-	-	-	-
Gauteng	48	-	-	-	-	-	-	-
Mpumalanga	57	-	-	-	-	-	-	-
Limpopo	15	-	-	-	-	-	-	-
Outside South Africa	-	60	6	-	-	-	-	-

The majority of the population is originally KZN born. There is a small population which was born from other provinces and from SADC.

6.7 Parental Survival

Orphanhood estimates becomes critical with the advent of HIV which has resulted in an upsurge in the numbers of children that are orphaned especially in Southern Africa, of which South Africa is part.

These estimates provides an indication of the number of children who are vulnerable, even though all age groups are indicated above , the focus is on children aged 0-19. The total number of aged 0-19 who reported that they had lost one or both parents is , 399 have lost their mother and 904 have lost their father, which is double the number of children without mothers.

This figure above clearly shows that paternal orphanhood is consistently higher than maternal orphanhood.

7. EDUCATION

Access to educational opportunities is a human right. This is one of the National Development Plan Goals. Through education individuals are prepared for future engagement in the labour market, which directly affects their quality of life as well as the economy of the country. Schools are the building blocks for the learning socialisation.

The South African Schooling Act (1996) made schooling compulsory for children aged 7-15 years, while education Laws Amendment Act (2002) set the age admission into grade 1 as the year which the child turns seven . Below a comparative overview of educational attainment and attendance by contributing factors such as population group, age group, sex is examined.

	Black African		Coloured		Indian or Asian		White	
	Male	Female	Male	Female	Male	Female	Male	Female
Grade 0	153	126	-	-	-	-	3	-
Grade 1 / Sub A	111	132	-	-	-	-	-	-

Other	6	15	-	-	-	-	-	-
No schooling	102	159	-	-	-	-	-	-

The figure above shows that the proportion of persons with no schooling is estimated at 768 mostly from the black African population. There has also been an increase in the proportion of individuals who have attained a level of education higher than grade 12 at 2706.

8. AVERAGE ANNUAL HOUSEHOLD INCOME

Figure 7: Average Annual Income of Sex by Population Group of head of household

	Black African		Coloured		Indian or Asian		White	
	Male	Female	Male	Female	Male	Female	Male	Female
No income	291	282	-	-	-	-	-	-
R 1 - R 4800	42	63	-	-	-	-	-	-
R 4801 - R 9600	66	135	-	-	-	-	-	-
R 9601 - R 19 600	102	225	-	-	-	-	-	-
R 19 601 - R 38 200	252	210	-	-	-	-	-	-
R 38 201 - R 76 400	270	165	-	-	-	-	-	-
R 76 401 - R 153 800	252	156	-	-	-	-	-	-
R 153 801 - R 307 600	297	153	-	3	-	-	-	-
R 307 601 - R 614 400	204	87	3	-	-	-	-	-
R 614 001 - R 1 228 800	57	6	-	-	-	-	-	-
R 1 228 801 - R 2 457 600	6	-	-	-	-	-	-	-
R 2 457 601 or more	6	-	-	-	-	-	-	-

Figure shows that an average female headed household earn very little on the annual income in 2011 as compared to their male counterparts, females earn an average of (at 9 601-19 600) while their male counterparts earns an average of (38 200-76 400). In the smaller income rank (R1–R4800) female headed households are still dominant even though they are very few in this particular ward, while their male counterparts dominate at the most upper income ranks. There is almost a balance with regard to the no income category for both females and males.

9. GENERAL HEALTH AND FUNCTIONING

The inclusion of statistics on disability serves as a crucial role in the identification of persons living with disabilities. This is one of the most marginalised and vulnerable groups in many societies regardless of whether they are rich or poor. The disabled who comes from the poorest cohorts of society inevitably have more serious problems than their wealthy counterparts as they lack resources to ameliorate their circumstances. Disparities are apparent between persons with impairments and those without. Disabled persons often have inadequate access to education, transport, health and other basic services making them vulnerable to the poverty trap and its associated vices.

Figure 8: Disability by type and degree of difficulty

Hearing	52802017: Ward 17	Seeing	52802017: Ward 17	Remembering	52802017: Ward 17
No difficulty	9474	No difficulty	8460	No difficulty	9252
Some difficulty	138	Some difficulty	1089	Some difficulty	162
A lot of difficulty	15	A lot of difficulty	114	A lot of difficulty	27
Cannot do at all	9	Cannot do at all	6	Cannot do at all	39

Self Care	52802017: Ward 17	Comunication	52802017: Ward 17	Walking	52802017: Ward 17
No difficulty	8610	No difficulty	9426	No difficulty	9378
Some difficulty	114	Some difficulty	87	Some difficulty	117
A lot of difficulty	24	A lot of difficulty	33	A lot of difficulty	27
Cannot do at all	195	Cannot do at all	39	Cannot do at all	24

Results indicate that most people in ward 17 (more than 90%) had no difficulty or limitation that prevented them from carrying certain functions at the time of the Census. There is large proportion that indicated a seeing difficulty, followed by those with a remembering difficulty and hearing challenges.

Figure 9: Assistive Devices

A question was included in the Census to measure what extent does the population, particularly those with disabilities access assistive devices to execute certain functions. The figure above depicts that eye glasses and chronic medication were more used compared to other assistive devices with 15% and 9% respectively.

10. OFFICIAL EMPLOYMENT

Figure 10: Employment by Gender

Figure 11 above indicate that a large percentage of population employed in ward 17 are males. A significant percentage of females are not economically active and they are also unemployed.

Figure 11: Employment by Population Group

On the above figure the black African population group being the majority in the ward, is the highest in terms of employment, unemployment, not economically active and also

discouraged work seeker categories as compared to other population groups. However employment in this ward is more that unemployment.

Figure 12: Employment by Sector

Employment is more on the formal sector followed by the informal sector and the least from private household.

11. HOUSEHOLD SERVICES

Housing is one of the basic human needs and has both direct and indirect implications on lives of households including health, welfare and social status in communities. This section highlights Census findings relating to types of main dwellings and basic services which have important policy implications.

11.1 Housing

Figure 13: Distribution of households by type of Dwelling

Figure 14, the figure above depicts that many households live in formal dwellings with houses made of bricks or concrete. Further the ward also has some few blocks of flats.

Figure 14: Distribution of Households by Tenure Status

The proportion of households who rent their dwellings is very high, followed by those who owned and fully paid off which almost equivalent to the owned but not yet paid off. Occupied rent free being the least.

11.2 Access to Water and Sanitation Services

Figure 15: Household with access to piped water

The figure above shows that a relatively higher number of households have access to piped water at ward 17.

Figure 16: Distribution of households by type of toilet facility

Source: Census 2011

The municipality has a mandate to improve sanitation to its residents. According to the graph above, the proportion of households that have flush toilets connected to sewer systems is

relatively higher and other alternative sanitation infrastructure is also utilised in this ward which include VIP toilets.

11.3 Access to Electricity /Energy

Figure 17: Distribution of households by type of energy used for lighting

Figure above shows that electricity usage for lighting in ward 17 is very high.

Figure 18 : Distribution of households by type of energy used for heating

Figure above shows that a high proportion of households in ward 17 use electricity for heating. There a small of percentage which have indicated None. It is assumed that these households were not connected to electricity before 2011 census.

Figure 19 : Distribution of Household by type of energy used for cooking

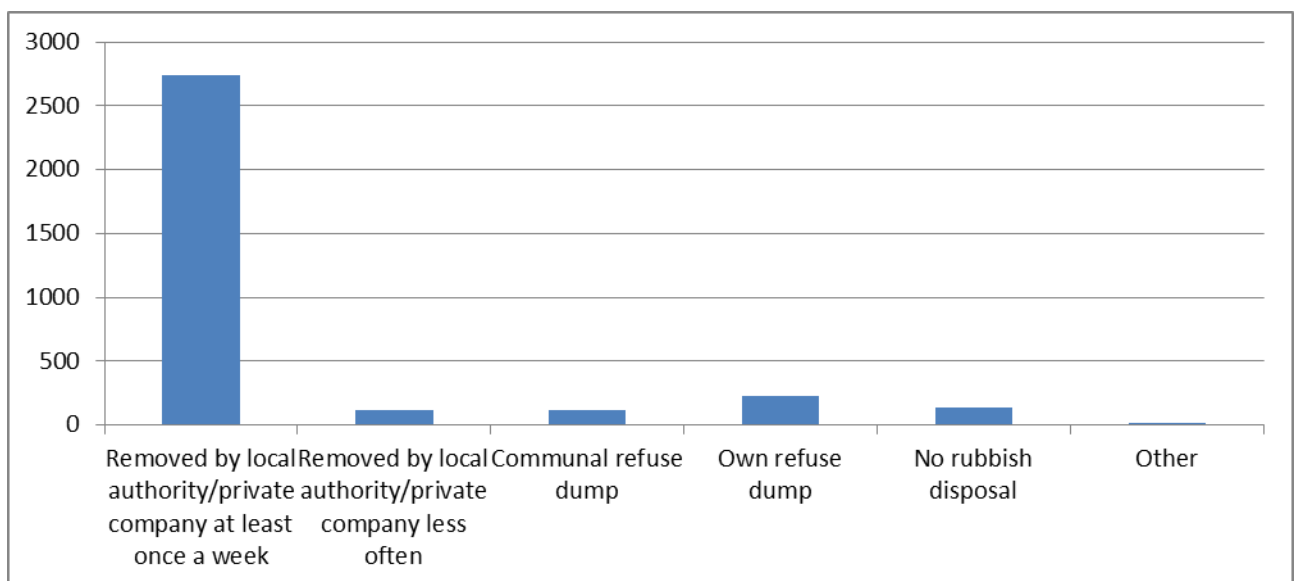

Figure above indicate a proportion of households using electricity for cooking is relatively higher than those using other means for cooking.

11.4 Access to refuse removal

Source: Stat SA, Census 2011

Figure above shows that the proportion of households that have refuse disposal service where refuse is removed by local authority weekly is consistently high in ward 17. It is noted that there is a small percentage of household that still uses its own refuse dumps and communal dump.

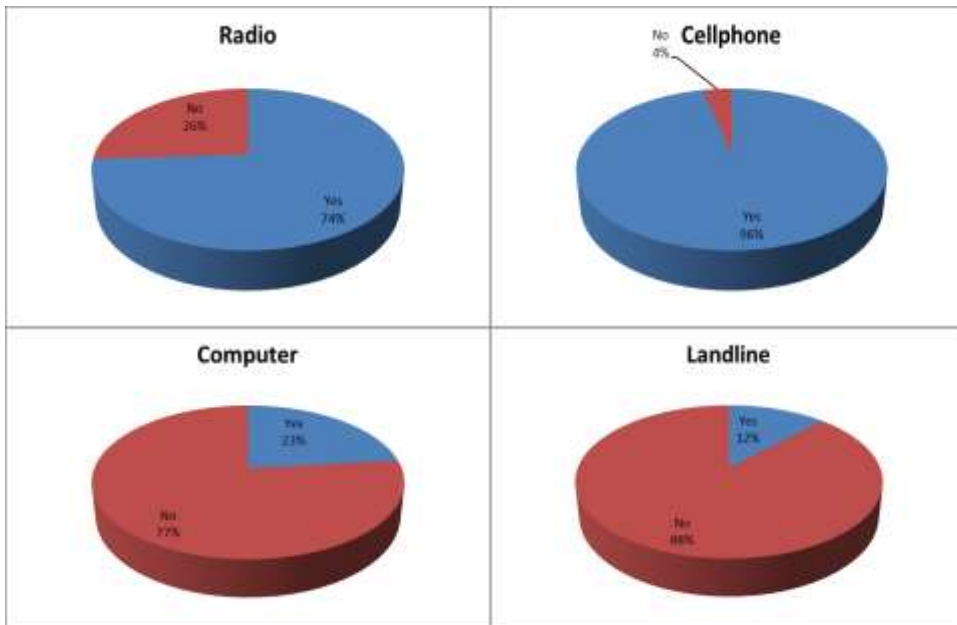

11.5 Household Goods

Figure 20: Percentage of households who have access to internet

The figure above shows the percentage of households who have access to internet; a relatively high proportion of households have no access to internet 37%. About 39 % percentage of households reported that they access internet from their cellphones . A very small percentage of households access internet from home, from work and elsewhere.

Figure 21 : Percentage distribution of households owning various households goods

The charts above shows the proportion of households owning cellphone is 96% while the proportion using landlines is 12%. The proportion owning radios is slightly lesser than those owning television. Proportion of households with computers is very low and at 23 but much better when compared with other wards.

It is evident that in general there is improvement in the access to basic services. Such improvements provide direct benefits to household in terms of better living conditions, environmental and health standards.

12. COMMUNITY PRIORITIES

RESPONSIBLE DEPARTMENT	COMMUNITY REQUESTS	COMMUNITY REQUESTS 2017/2018
Infrastructure & Technical Services	Street Humps	Maintain roads and speed humps
	Installation of Streetlights	Pedestrian bridges
	Need electricity	Need water
Community Services	Housing	Jobs
